

**SUN MICROSYSTEMS INTRODUCES THE AUTHORITATIVE WIRELESS DEVELOPER PORTAL:  
WIRELESS.JAVA.SUN.COM**

*Wireless Java Developers Worldwide Now Have Access to a Single, Central Resource for Building Better Wireless Java Applications Faster*

SAN FRANCISCO, CA – JavaOne[sm] Developer Conference -- March 25, 2002 -- Committed to supporting Java[tm] technology developers in the burgeoning wireless application market, Sun Microsystems, Inc. today highlights its new Wireless Developer Portal, WIRELESS.JAVA.SUN.COM. Exemplary of the Sun Developer Connection[sm] program's commitment to the developer community, the new site is the authoritative, central resource dedicated to helping Java technology developers successfully develop, deploy and make money from wireless Java applications.

As businesses increasingly turn to Java technology as their platform of choice for delivering Web services, WIRELESS.JAVA.SUN.COM. will help developers meet this demand with the tools, resources and community support needed to develop compelling, innovative applications for mobile computing. Created by the leaders in authoritative Java developer support, the Java Developer Connection[tm], this new resource supports the individual developer's efforts by providing them with a means to learn, solve problems, grow technically and connect with opportunities in the wireless market.

"wireless.java.sun.com will quickly become the home of the wireless developer because it goes beyond technical content to provide strategies and resources developers need to navigate the wireless ecosystem -- from development to provisioning to billing," said Paul Pangaro, senior director of Developer Web Services of Sun Microsystems. "This site will be a boon to millions of Java developers because they will now be able to get great wireless Java technology support from their most trusted source, the Java Developer Connection."

As the first standards-based wireless resource with end-to-end Java solutions, WIRELESS.JAVA.SUN.COM. offers an easy way for developers to get started on Java(tm) 2 Platform Micro Edition(J2ME[tm]) standards and tools. Some of the site's resources include:

- Tutorials, case studies and reports to learn from scratch or build on existing knowledge base
- Forums to get quick answers to practically any type of programming problem
- Code Drop for sharing code among peers
- Bug Database to learn the status of bugs and workarounds
- RSS compatibility providing access to the News and Highlights page from any wireless device.

**About JavaOne Conference**

JavaOne is the world's largest conference for developers. Started in 1996, JavaOne provides opportunities for developers and businesses who want in-depth technical training, a chance to network with top developers and exposure to real-world solutions and the over-arching developer community. For more information about the Conference, visit <http://java.sun.com/javaone/>.

**About the Sun Developer Connection Program**

Building on Sun's vision to enable services on demand with the latest open technologies, the Sun Developer Connection (SDC) program offers individual developers and software development partners a single, worldwide entry point to build a technical and business relationship with Sun. As one of the largest developer communities in the world, the SDC program is the connection to Sun for comprehensive resources to build and market solutions leveraging Sun's open technologies, products, business development, and community forums. All programs, registration and eligibility information can be found at <http://www.sun.com/sdc>

**About Sun Microsystems, Inc.**

Since its inception in 1982, a singular vision -- The Network Is The Computer[tm] -- has propelled Sun Microsystems, Inc. (Nasdaq: SUNW) to its position as a leading provider of industrial-strength hardware, software and services that power the Internet and allow companies worldwide to take their businesses to the nth. Sun can be found in more than 170 countries and on the World Wide Web at <http://sun.com>.

Sun, Sun Microsystems, the Sun logo, Java, JavaOne Developer Conference, The Network Is The Computer, Sun Developer Connection, Java Developer Connection and J2ME, are trademarks or registered trademarks of Sun Microsystems, Inc. in the United States and other countries.
